CNC Operator – 2nd Shift

Elna Magnetics is looking for dedicated, conscientious individuals in our CNC department. We offer a generous benefit package and a great opportunity for a work-life balance. If you are ambitious, like learning new things and want a career rather than a job we want to talk to you.

We provide standard magnetic cores and accessories as an authorized distributor of several product lines and through our manufacturing services department we machine custom products to meet customer specifications.

Our CNC Operators are responsible for operating CNC machining centers in addition to operating other machine shop equipment used in the manufacture of gapped and custom magnetic products including the setup and run for a particular job.

Is this the job for you?

Job Responsibilities:

- Inspects finished product to ensure specifications for a particular operation are met.
- Reads and understands all manufacturing instructions (MI's), drawings and quality requirements.
- Can perform all setups required to meet manufacturing instructions with minimal assistance from the group leader or other personnel with the exception of the CNC machining centers.
- Operates the CNC machining centers for the manufacture of various magnetic cores using the setup and instructions provided by the General Foreman and/or group leader and/or a CNC programmer/operator.
- Notify group leader and/or operations manager of problems with equipment and/or product.
- Inspect product using measuring devices such as micrometer, caliper optical comparator and/or a Unitron microscope.
- Follow all safety, quality and departmental procedures.
- Troubleshoot simple problems that arise in the day-to-day machining environment.
- Provide input to the group leader and/or general foreman on machine process improvements related to efficiency and/or quality.
- Dresses wheels and chucks and sets up associated tooling.
- Perform other duties as assigned in order to meet organizational and customer objectives and business conditions.

Qualifications:

- General understanding of mechanical equipment.
- Good hand-eye coordination.
- Ability to use small hand tools.
- Ability to use measuring devices such as micrometer and calipers.

- Ability to use various optical inspection and measuring devices.
- Good working knowledge of basic math.
- Good communication skills
- US citizen due to ITAR regulations.

Education & Experience:

- High school diploma or GED.
- A minimum of one (1) year machining experience, at least one (1) of which is operating a CNC machining center used to manufacture magnetic cores.
- Additional experience may be considered in lieu of education requirements.

You'll be with us:

- Full-time
- You will be on 1st shift hours (6am-4:30pm) for 1-3 months
- Your regular shift after the first couple of months will be: 2nd shift: Monday through Thursday 3:30pm-2am – with 2nd shift differential
- Overtime available, as needed

Benefits of working with us:

- Comprehensive compensation package including annual performance reviews
- Free medical for employee
- Dental, vision and life insurance, 401K program with a company match on contributions
- 8 paid holidays
- Flex time available
- Generous paid time off program

Salary Range:

\$21-25/hour
