Miles-Platts Coil Bobbins for Laminations

Not sure where to start? Use the table below to help you choose which coil bobbin is suitable for your application. If you need any assistance, can't find what you need or need to ask a question about materials, please call - we're only too happy to help.

UK/USA Format Coil Bobbins for Laminations (Section 3)

30% Glass Filled Nylon PA66 to UL94HB & UL94V0 or PET to UL94V0. Alternative materials available - refer to section 2, page 10

Lamination Size / Pattern		Plain Bobbins or Optional terminals fitted Choose from TBS 900 Series (Section 9)	No terminal options
UK	US		
250	375		K Range - Section 3, page 14 - Slotted Cheeks - SS & DS - 2FL & 3FL - No Terminals
621			
18	560 (9/16)	S Range - Section 3, page 26 - SS, DS & SDS - 2FL, 3FL & VDE

SMPS Power throughput for transformer types @ 100KHz.

MILES · PLATTS

“ We aim to satisfy and service the ever changing needs of our customers. ”

“ Wir streben danach, die sich ständig ändernden Bedürfnisse unserer Kunden zu befriedigen. ”

“ Nous cherchons à satisfaire et répondre aux besoins toujours changeant de nos clients. ”

“ Nuestro objetivo es satisfacer y mantener un servicio excelente que copen las diferentes necesidades de los clientes, que pueden ”
variar mucho según el tipo de mercado.

Moulding Materials

All materials are RoHS and REACH Compliant – please refer to website for details and certificates.

Miles Platts have the knowledge and capability to design and process in an extensive variety of engineering thermoplastic and thermoset materials, giving design engineers flexibility to select the most appropriate grade to achieve a cost effective solution. Miles Platts work closely with leading polymer manufacturers such as DuPont, Rhodia, B.A.S.F., DSM, Ticona, EMS and Chevron Phillips, continually testing new and advanced materials ensuring that customers benefit from leading edge moulding technology.

Common materials are as follows:

Nylon 66: 30% Glass Reinforced & Unreinforced

Used in the majority of coil bobbin applications world-wide due to its good electrical and flammability properties and ability to mould thin sections whilst retaining a high degree of stiffness. Unreinforced Nylon 66 and Glass Reinforced Nylon 66 have a recommended temperature rating of Class B (130°C). Some grades have UL 1446 insulation systems up to Class F (155°C)

Flame Retardant Nylon 66: 25% Glass Reinforced & Unreinforced

These materials have similar characteristics to Nylon 66. A Halogen-free Flame Retardant system is incorporated to meet a flammability rating of UL94V0 and to meet the 960°C glow wire requirements (IEC 60695).

Nylon 46 30% Glass Reinforced

Nylon 46 differs from Nylon 66 having higher heat resistance, is tougher, more rigid and has less creep at high temperatures. Available in UL94V0.

Due to its high crystallinity, Stanyl retains a high level of stiffness at temperatures close to its melting point. This property can prove an advantage when soldering at higher temperatures.

Liquid Crystal Polymer – LCP

LCP Benefits from superior high temperature performance and dimensional stability whilst moulding extremely thin sections. LCP has inherent flame retardancy to UL94V0.

Thermoplastic Polyesters – PBT and PET

These materials are increasingly selected for applications where high stiffness, low moisture absorption, dimensional and thermal stability characteristics are required.

Polyphenylene Sulfide – PPS

PPS has a high resistance to deformation, benefiting from extreme stiffness and is very stable at high temperatures. PPS is inherently flame retardant.

Frame VA Ratings

Frame VA capabilities shown on standard bobbin tables for laminated core transformers are based on an approximate 70°C temperature rise for single section bobbins and should only be taken as a design guide. The actual output VA that can be achieved will depend upon the utilisation factor of the available bobbin winding area for the wire sizes, screens and interwinding insulation used in the design.

UL Approved Moulding Materials

The above list reflect materials used for our standard ranges and popular choices used for customer designed products.

The materials generally used for our standard ranges are shown on the applicable catalogue page.

Please contact our sales department if you cannot find a suitable material above for your application.

Maximum system temperature recommendation based Available UL 1446 insulation systems or experience and customer feedback.

Material data sheets are available to download from our web-site www.milesplatts.co.uk

GNN is Miles Platts material code for a 30% Glass Reinforced Nylon to a flammability rating of UL94HB – We currently use the materials as listed above, but we reserve the right to use an alternative material of the same or better characteristics should quality or commercial reasons arise. Please use the specific material code* to specify a particular material.

UNN is Miles Platts material code for an Unreinforced Nylon (used primarily for Insulation covers and potting boxes) to a flammability rating of UL94V2 – We currently use the materials as listed above, but we reserve the right to use an alternative material of the same or better characteristics should quality or commercial reasons arise. Please use the specific material code* to specify a particular material.

FGN is Miles Platts material code for a Glass Reinforced Nylon to a flammability rating of UL94V0 – We currently use the materials as listed above, but we reserve the right to use an alternative material of the same or better characteristics should quality or commercial reasons. Please use the specific material code* to specify a particular material.

If a specific material is required as in the case of complying with a UL 1446 insulation system, the material must be clearly stated on your purchase order.

Responsibility For Selection

The responsibility for the selection of appropriate materials and systems lies with the manufacturer of the electro-technical product. Only experience or adequate acceptable tests provide basis for assigning rational temperature limits for the insulation. Service experience is an important basis for the selection.

The property data used has been taken from material manufacturers data sheets and UL (QMFZ2 and UL1446) test results. Miles Platts Limited has made every effort to ensure this property data has been collated without error or omission, but ultimately it is the responsibility of the customer to independently verify this data before final design approval.

Layout of the UL iQ™ Yellow Card

Component - Plastics E41938 — UL File Number

Manufacturer's Name: **E I DUPONT DE NEMOURS & CO INC**
ENGINEERING POLYMERS, CHESTNUT RUN PLAZA, PO BOX 80713, WILMINGTON DE 19880

Material Grade: **FR530 (I) (+) (f1), FR530L (I) (+) (f1)**

UL94 Flame Class: **Polyethylene Terephthalate (PET), glass reinforced, flame retardant, "Rynite", furnished as pellets**

Minimum Thickness Approved: **0.35 mm**

Material Colours Tested: **NC, BK, ALL, NC, NC, BK, ALL, ALL**

Colour	Min. Thick. mm	Flame Class	HWI	HAI	RTI Elec	RTI Imp	RTI Str
NC, BK	0.35	V-0	3	1	155	-	-
ALL	0.75	V-0	2	1	155	155	155
NC	0.9	V-0, 5VA	2	1	155	155	155
NC, BK	1.5	V-0, 5VA	0	1	155	155	155
ALL	2.0	V-0, 5VA	0	1	155	155	155
ALL	3.0	V-0, 5VA	0	1	155	155	155

Comparative Tracking Index (CTI): 2 Dimensional Stability (%): 0
 High-Voltage Arc Tracking Rate (HVTR): 1 High Volt, Low Current Arc Resis (D495): 6
 Dielectric Strength (KV/mm): 34 Volume Resistivity (10⁸ ohm-cm): 16

(+) - Virgin and regrind up to 50% by weight inclusive, have the same basic material characteristics.
 (f1) - Suitable for outdoor use with respect to exposure to Ultraviolet Light, Water Exposure and Immersion in accordance with UL 746C.
 (I) - Recognised ground insulation component at 0.4mm with MW79 in UL1446 Class 155 electrical insulation system designated R201N (File E69939).

NOTE - (1) Material designations that are color pigmented may be followed by suffix letters and numbers.
 (2) Material designations may be prefixed by "ZYT" or "MIN" for Minion or "DEL" for Delrin or "CRA" for Crastin or "RYN" for Rynite or "ETPV" for ETPV grades.

ANSI/UL 94 small-scale test data does not pertain to building materials, furnishings and related contents. ANSI/UL 94 small-scale test data is intended solely for determining the flammability of plastic materials used in the components and parts of end-product devices and appliances, where the acceptability of the combination is determined by UL.

Report Date: 1996-01-04. Last Revised: 2008-09-05. Underwriters Laboratories Inc®

IEC and ISO Test Methods

Test Name	Test Method	Units	Thickness Tested (mm)	Value
Flammability	IEC 60695-11-10,	Class (color)	0.35	V-0 (NC, BK)
	IEC 60695-11-20		0.75	V-0 (ALL)
			0.9	V-0, 5VA (NC)
			1.5	V-0, 5VA (NC, BK)
			2.0	V-0, 5VA (ALL)
Glow-Wire Flammability (GWFI)	IEC 60695-2-12	C	0.75	960
			0.9	960
			1.5	960
			2.0	960
			3.0	960
Glow-Wire Ignition (GWIT)	IEC 60695-2-13	C	0.75	800
			0.9	800
			1.5	800
			2.0	985
			3.0	985
IEC Comparative Tracking Index	IEC 60112	Volts (Max)	-	-
IEC Ball Pressure	IEC 60695-10-2	C	3.0	245
ISO Heat Deflection (1.80 MPa)	ISO 75-2	C	-	-
ISO Tensile Strength	ISO 527-2	MPa	-	-
ISO Flexural Strength	ISO 178	MPa	-	-
ISO Tensile Impact	ISO 8256	kJ/m2	-	-
ISO Izod Impact	ISO 180	kJ/m2	-	-
ISO Charpy Impact	ISO 179-2	kJ/m2	-	-

Underwriters Laboratories Inc®

Yellow cards for all of our moulding materials can be found at <http://iq.ul.com>. Miles Platts is a UL recognised moulder - E176491

Approval of engineering plastics

UL approval is generally essential before equipment can be sold in the United States. Approval tests on equipment are lengthy and expensive. The operation can however be greatly simplified if UL-approved materials, i.e. appearing on the yellow cards, are used. Engineering plastics manufacturers are therefore having an increasing number of materials approved to make things easier for users.

Approval covers three aspects:

- flame class, governed by the UL 94 standards,
- temperature indices, governed by the UL 746 B standard,
- basic properties, determined under the UL 746 A standard.

The results are given for each material, in each colour, and for a specific thickness, which is the actual thickness of the specimen tested. This means that comparisons between materials are valid only if the thickness is the same.

Miles Platts achievement as a UL Recognised Moulder

QMMY2.E176491 - January 20, 1997

Fabricated Parts - Component

MILES-PLATTS LTD

Unit Z, Blaby Industrial Park,
Winchester Avenue, Blaby,
Leicester LE8 4GZ, United Kingdom

E176491

Fabricated plastic parts, Recognition based on material traceability, UL assigned designation A1753.

Marking: Company name and UL assigned designation on part, shipping carton, or spec sheet in shipping carton.

The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL's Follow-Up Service. Only those products bearing the UL Mark should be considered to be Listed and covered under UL's Follow-Up Service. Always look for the Mark on the product.

UL permits the reproduction of the material contained on UL's Website subject to the following conditions:

1. The Guide Information, Designs and/or Listings (files) must be presented in their entirety and in a non-misleading manner, without any manipulation of the data (or drawings).
2. The statement "Reprinted from the Online Certifications Directory with permission from Underwriters Laboratories Inc." must appear adjacent to the extracted material. In addition, the reprinted material must include a copyright notice in the following format: "Copyright © 2004 Underwriters Laboratories Inc.®"

When using a moulded bobbin in a UL1446 electrical insulation system a UL recognised moulder must manufacture the bobbin to ensure full traceability of materials.

RoHS Statement

All standard moulding materials used by Miles-Platts are certified by the relevant manufacturer to comply with European directive 2011/65/EU (RoHS). Please refer to our website for further information.

Miles-Platts provide lead-free plating on all terminals & wire.
Please consult technical sales for any specific requirements or information.

REACH Statement

All standard moulding materials used by Miles-Platts are certified by the relevant manufacturer to comply with European REACH directive. Please refer to www.milesplatts.co.uk for further information.
